

Model 146L PTP Linear Shale Shaker

Triflo model 146L PTP Linear Shale Shaker using two vibratory motors we eliminated all but one machined component and have given our customers the ability to adjust G-Force in the field without adding extra weights. This shaker also uses a hydraulic jacking system that allows you to adjust deck angle from one degree below zero to 5 degrees above zero. Combining the above new features with the use of three pretention panel screens Triflo can deliver a hard working high output shaker that can save you time and money.

Specifications:

Width: 69"	Weight: 4450lbs	Full Load Speed: 1750 RPM - 460 Volts 60 HZ
Length: 96"	Volume: 750 GPM	Amp Load: 2.95
Height: 55"	Screen Area: 24 Sq. Ft.	Starting Amps: 25.10
Centrifugal Force: 7551 lbs.	G-Force max: 6.3g's	Motor Horsepower Rating: 2.30 HP.
